**ALWAYS
DELIVER
MORE
THAN
EXPECTED**

GENERAL SERVICES BROCHURE

ABOUT US

Emprise Concepts is a DBE/ESB Colorado-based engineering firm founded in 2018 with the goal of providing valuable insight on civil infrastructure projects.

Our team is well versed in both design and construction, which proves instrumental in delivering successful, quality projects. With a strong understanding of owners' expectations and an appreciation for the challenges contractors face, we strive to inspire all members of a project team to work collaboratively to produce positive results for all parties.

OUR SERVICES

Emprise Concepts provides construction management and specialized engineering services for infrastructure projects. We work with private and public companies, government agencies and as sub-consultants to prime contractors. Our firm is well versed in both design and construction, enabling us to provide a customized scope of services to meet our clients' needs

CONSTRUCTION MANAGEMENT

Emprise Concepts is qualified to perform all services for construction management and inspection. Our project managers have worked as designers, construction managers, and contractors.

GEOTECHNICAL ENGINEERING

With an appreciation for the complexities and uncertainties often faced in subsurface conditions, we take a holistic approach to ground characterization, risk assessment, and geotechnical engineering.

CONSTRUCTION DATA ANALYSIS

Our expertise in data analytics, data science, and machine learning allows us to maximize the information and knowledge obtained from the ever-increasing volume of data collected on large civil infrastructure projects.

MISSION AND VALUES

As part of Emprise Concepts' approach to providing exceptional service, we consider how every decision has a direct impact on the public. By taking a collective approach, basing decisions on sound engineering judgment, understanding our ethical responsibilities, and striving for sustainability, Emprise Concepts provides superior service to its clients, while actively contributing to the enrichment of our surrounding communities.

RECENT WORK

From CM/GC project delivery to rural and urban roadways, the Emprise Concepts team has worked on a variety of transportation infrastructure projects.

TYPES OF ENGINEERING EXPERIENCE

Emprise Concepts has experience in roads/highways, bridges, underground construction and tunnel engineering, earthworks, data management, visualization, and interpretation. Our talented team of high-performing professionals strive to exceed expectations in all that we do. As part of Emprise Concept's approach to providing exceptional service, we consider how every decision has a direct impact on the public.

OUR RECENT PROJECTS
